WWW.DESIGNFH.COM

Senior interior designer with 9+ years of professional experience across the hospitality, healthcare, aviation, corporate, and residential sectors. Proven track record collaborating with diverse teams ranging from boutique six-person firms to large-scale multi-office companies.

Technical expertise includes extensive Revit proficiency, serving as a key team member and BIM coordinator while simultaneously driving the design process in various projects. Creative capabilities extend from initial concept creation through construction documentation and administration.

Additionally, my background as a multimedia artist facilitates the development of custom art, murals, signage, and graphic packages that can be integrated into the brand and design development. My past experience as administrative personal assistant has provided me the skills and commitment to organization, efficient workflows, and proactive planning to ensure successful project documentation and execution.

PROJECTS

Call Your Mother, Chicago - 2025 - 2026 - Collaborated from site scan to CA, on multiple locations. Concept development for each location, and incorporation of brand standards. Created renderings, for design presentations and documented the interior scope for permit sets while coordinating with the architectural, KEC, and MEP teams.

Marhuatee, 2024 - Concept development influenced by the local landscape, culture and local materiality. Created a revit model for the renderings, design presentation, video walkthrough and preliminary documentation. Assisted with initial FFE selection for design proposals. Project submission included the complete revit model for the documentation of construction drawings by the local architectural team.

Piccolo Buco, Naperville and Schaumburg - 2023 - Participated through concept creation and brand influence, lead a team and collaborated through design development phase.

STK, Charlotte, NC - 2022 - 3D revit model creation, FFE implementation of brand standards.

Created DD presentations, FFE, artwork and accessory packages, lead CDs documentation and collaborated through construction administration, while simultaneously collaborating on 3 other locations at different phases for the same client. Developed ceiling ribbon modeling standardization and documentation, implemented by other locations.

D. Dan and Betty Kahn Health Care Pavilion, LEED v4 Platinum, Ann Arbor. MI - 2021 - Assisted with all phases from concept development to CDs, including 3D modeling and rendering for DD presentations using revit and enscape. FFE selection and BIM coordination across sectors to ensure proper documentation per client standards.
